

PUBLIC NOTICE

CITY OF PORTSMOUTH

Mosquito Control

The Mosquito Control program begins April 10, 2023 in the City of Portsmouth. Crews from Dragon Mosquito Control, Inc. will be checking swamps, salt marshes, woodland pools, ditches, catch basins, storm drains and other shallow, stagnant water for mosquito larvae. When mosquito larvae are found, treatment may occur using one or more of the following insecticides:

VectoBac (*Bacillus thuringiensis israelensis* 2.8%)

VectoBac 12 AS (*Bacillus thuringiensis israelensis* 11.61%)

Fourstar Bti CRG (*Bacillus thuringiensis israelensis* 10%)

Natular (spinosad 2.5%)

BVA 2 Mosquito Larvicide Oil (mineral oil 97.0%)

SunSpray MLO (mineral oil 98.8%)

Citywide night time fogging along roadways is not planned. There is no schedule at this time to conduct emergency spraying for disease carrying mosquitoes. The determination to spray adult mosquitoes at city and school owned property is based on mosquito surveillance data, disease test results and weather conditions upon concurrence with city officials. Diseases such as EEE and West Nile Virus are found in mosquitoes during the latter part of the summer and early fall. Further communication will be given if emergency spraying is going to take place.

Residents who do not want their wetlands treated may use our No-Spray Registry online at www.DragonMosquito.com/No-Spray-Registry or write to Dragon Mosquito Control, P.O. Box 46, Stratham, NH 03885. Be sure to include your name, physical address, phone number, house color and acreage. Call 603-734-4144 or email www.DragonMosquito.com for more information on spray dates, location, materials used, precautions or other concerns.
